

2023, Lottery- Median Number of School Selections

Applicants can select and rank up to 12 schools on each student’s application. The median number of schools selected on each application varies by grade. For example, the median number of schools selected was four for PK3 applicants, while in PK4 the median number of school selections was three.

Overall, in 2022 the median number of schools selected per application was three out of a possible total of 12. This trend is consistent to prior lottery cycles.
